Fam GTM Communication Strategy

Teen wallet today, financial sidekick tomorrow- Fam grows with you

Submitted by:

Executive Summary

Fam is evolving from a teen UPI app into Gen Z's financial playground- where money meets social vibes and daily life. With Fam Lite for teens and Fam Pro for young adults, we shift from utility to lifestyle. Through peer-driven GTM, community-first campaigns, and culturally relevant touchpoints, Fam will make financial independence fun, social, and sticky.

1. **Target Audience**

   Non-users & ex-users aged 16-20 (split into 16-17 & 18-20)

2. **Discovery Channels**

   Word-of-mouth, Instagram (memes/reels), offline vendors, YouTube next

3. **Key Motivations**

   Cashbacks/rewards, UPI without bank (wallet/PPI), group/split needs, ease & speed

4. **Drop-off Points**

   KYC discomfort, ₹99 fee confusion, app performance (weak Wi-Fi), trust issues

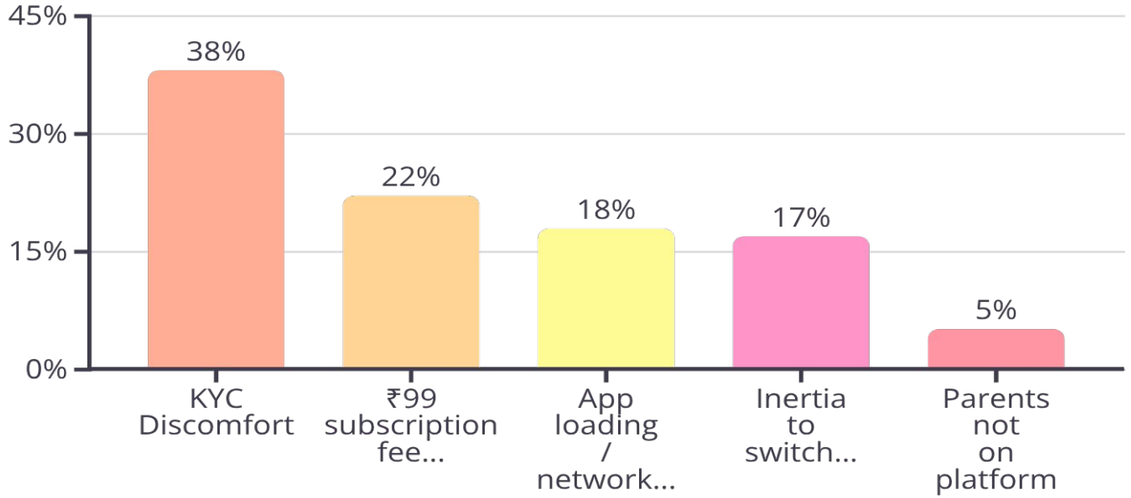

5. **North Star**

   Revenue with retention above 18; non-payment hooks needed

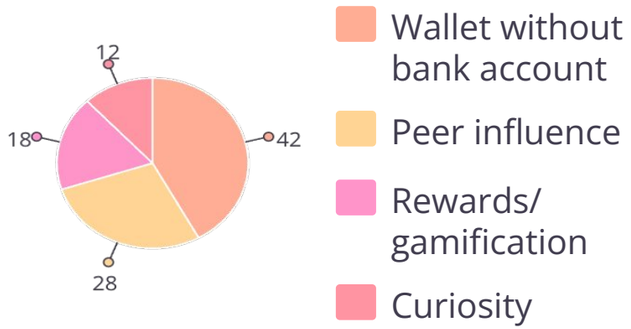

Unpacking the User Journey

We conducted interviews with 20 respondents (ages 16–20), including a mix of non-aware users, aware-but-non-users, ex-users, and current users. Interviews were conducted via phone calls, recorded, and transcribed for analysis. Insights revealed onboarding friction (KYC, fees, app glitches), awareness driven primarily through word-of-mouth and Instagram, and distinct communication needs across age groups

Reasons for churn/ Friction Points in Onboarding

Motivation to try Fam

Key Insight: Fam's brand perception has an **expiration date** - users see it as a "starter app" that loses relevance once they turn 18 and gain access to mainstream apps like Google Pay and Paytm.

- Mandatory KYC is cumbersome post-18
- Missing features like bill-splitting, SIPs, and rewards reduce relevance
- Playful UI feels immature to older users
- Trust and habit strongly favour mainstream UPI apps

The New Brand & Product Strategy

Fam evolves from a teen payments app to a **lifelong Financial Sidekick**, empowering Gen Z (16–22) to "Level Up Their Money Game." This transforms the 18+ KYC moment into a milestone, not a friction point, by introducing two distinct, connected tiers:

Fam Lite (Ages 11–17)

Purpose: Entry point for financial independence and digital money confidence.

Features: Wallet-based UPI, pocket money management, gamified “Locker” savings, basic insights.
UI/UX: Playful, colorful, gamified, and easy for minors.

Messaging: "Your first money app. Safe, simple, and parent-approved."
Behavioral Hooks: Rewards, streaks, skins, and peer visibility.

Fam Pro (Ages 18+)

Purpose: Tool for financial mastery and autonomy.

Features: Seamless bank linking, advanced spending analytics, bill-splitting, micro-investments.
Activation: "Level Up" via KYC at 18 – a milestone achievement.

UI/UX: Sleek, professional, tailored for control and reliability.

Messaging: "Don’t just pay. Understand, control, and own your money."
Behavioral Hooks: Advanced insights, social pooling, personalized nudges.

Core Communication Ideas

How Fam Speaks Across the Journey: From First Money to Financial Mastery

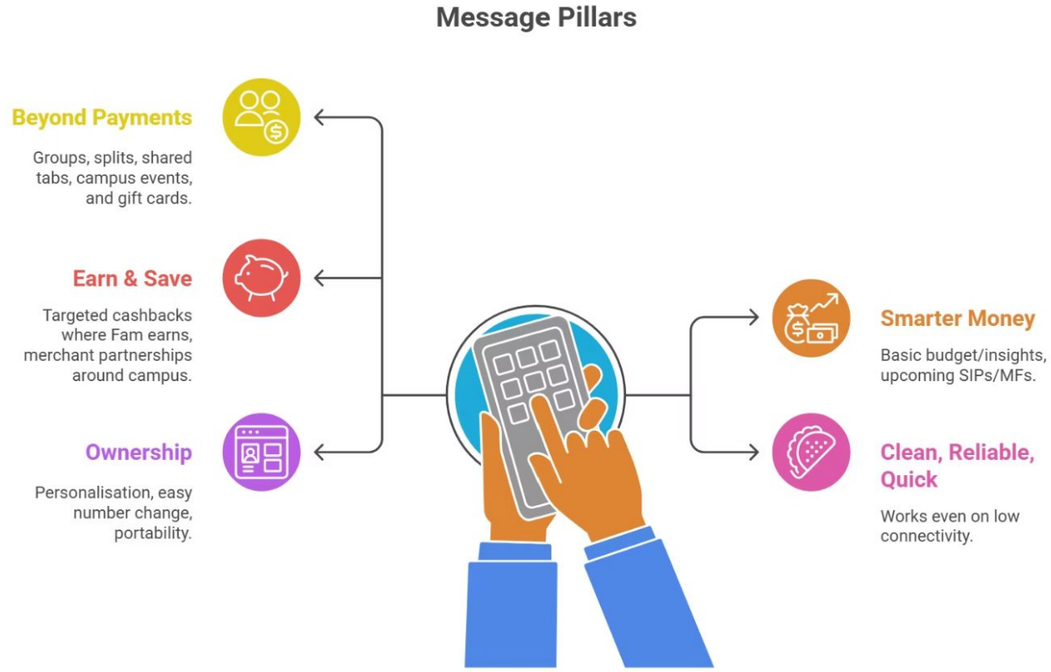

Ages 16–17

> "Your first money app- safe, parent-friendly, no bank needed."

Ages 18–20

> "Do more than pay- organise money with friends, earn rewards, and keep it simple.

Segment A: Ages 16–17 (Minors)

Mindset & Needs

- Social-first: learn about money where friends hang out
- Wanna pay without begging parents for OTPs
- Need trust stamp for KYC (RBI, parent-safe)
- Hate boring banking apps, want fun + flex

Where they scroll

Instagram → reels, YouTube Shorts, meme-led hooks

WhatsApp → groups, class gossip chains, peer pushes

Campus ambassadors → school & college reps driving adoption

Offline touchpoints → posters near tuition centers, campuses

Message Pillars

“Bank-free UPI” → just sign up, start paying

“Parent-approved wallet → swipe, split, save.”

“Money but social” → squads, splits, streaks, skins

“Cashback > Pocket Money” → instant rewards

Example Copy

- *"No account? No problem. Just your phone → instant UPI."*
- *"Cash meets clout: unlock streaks, skins & squad goals."*
- *"Who needs pocket money when cashback hits instantly?"*
- *"Spend. Tap. Boom — instant rewards."*

Segment B: Ages 18–20 (Young Adults)

Mindset & Needs

- Already on Google Pay / PhonePe / Paytm → need clear reason to switch
- Want **value + reliability**, not gimmicks
- Frictions: ₹99 fee clarity, KYC/Aadhaar glitches, poor Wi-Fi = failed transactions

Go-to Channels

YouTube → explainer shorts, creator collabs

Instagram → reels, meme-led education

Campus activations → stalls, fests, peer ambassadors

Communities → Discord, WhatsApp

Local tie-ups → canteen, café, PG merchants

Message Pillars

Beyond payments → splits, groups, gift cards

Smarter money → budgets, insights, intro to SIPs/MFs

Earn & save → cashbacks + student-first offers

Clean & reliable → works even on patchy Wi-Fi

Ownership → personalization + easy number change

Example Copy

> - *“One app. Pay, split, chill - no money drama.”*
> - *“Your college wallet: smart splits, real rewards.”*
> - *“Works even when the Wi-Fi doesn’t.”*
> - *“Not just payments. Smarter money, made for you.”*

Lifecycle Communication Playbooks

Fam's playbook: from awareness to daily habit

Awareness → Install

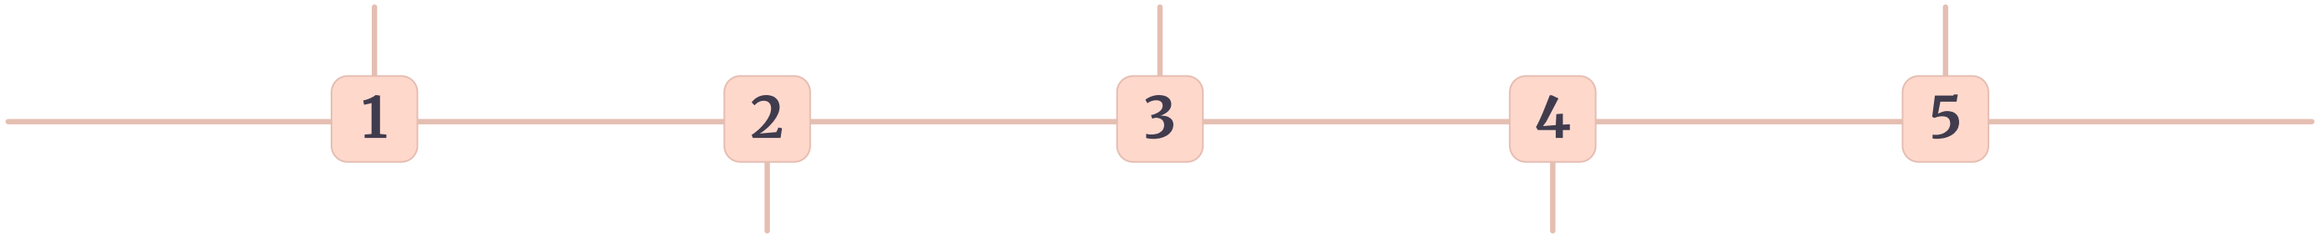

16-17: IG reels, Influencer shoutouts, campus buzz**18-20:** YT demos, campus posters, peer invites

First Value

Help them spend right away (where to use Fam), Contextual tips, UPI Circle for instant engagement

Churn & Winback

Explain "safe with RBI" trust angle,Fee holiday nudges, Lite mode reminders for lapsed users

Install → KYC Completion

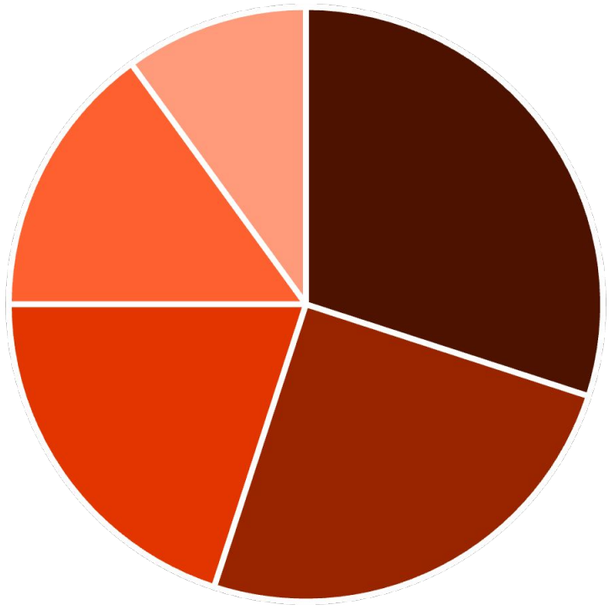

RBI badge & security reassurance, Fun nudges + progress bar to reduce drop-off

Habit & Retention

16-17: streaks, fun reminders, social nudges

18-20: budget insights, split reminders, gift card bundles

Channel Plan & Suggested Split

- Instagram
- YouTube
- Campus Ambassadors & Events
- WhatsApp/Discord Communities
- Merchant/Vendor Partnerships

Our GTM strategy would leverage a dynamic mix of digital and physical channels, designed to drive adoption from awareness to habit. Our focus is on where Gen Z lives, and our approach is to convert discovery into peer-driven growth, supported by a strong organic foundation.

Instagram (30%): Drive awareness and installs with **Reels and memes** for a younger audience

YouTube (25%): Build **credibility and trust** with explainer videos and finance creator partnerships

Campus (20%): Grow through **peer-to-peer influence** with interactive events and activations

Merchants (10%): Encourage first payments and habit with **cashbacks at popular spots**

Communities (15%): Nurture for **long-term retention** via discussion and challenges

Fee & KYC Communication Guidelines

Turning Friction into Trust

1

Fee Clarity

State fee rule upfront: who, when, why. Use age toggle to show transparent pricing

Frame it as a choice: All optional fees will be tied directly to a clear benefit.

2

KYC Transparency

Reframe **KYC as a "Level Up"** milestone.

Use a **progress bar** and a **20-second video** to explain the process, benefits, and data security.

3

Aadhaar Failures

Provide **proactive, helpful guidance.**

Replace generic errors with **clear on-screen instructions** and proactive notifications about system issues.

Sample Assets

IG Reel (16-17)

- Hook: "No bank? No problem."
- Show: Wallet UPI top-up, canteen payment.
- CTA: "₹200 → gift-card draw. Start today."

YT Demo (18-20)

- Hook: "UPI is great. Splitting isn't."
- Show: Group creation, auto-split, monthly wrap-up.
- End: "Do more than pay. Fam it."

Parent One-Pager

- Header: "Your teen’s first wallet, with your peace of mind."
- Bullets: RBI PPI, data minimization, spend limits, no loans.
- CTA: "Learn how Fam keeps teens safe."

Next Steps & Execution: Our Plan to Double Down

Our strategy for the next 6-12 months will focus on three key pillars: Product Evolution, Brand Building, and Targeted Growth.

Product Evolution

Fam Pro: Launch key features for young adults, including Spending Analytics, Bill-Splitting, and SIPs.
Fam Lite: Enhance gamification with streaks and micro-rewards to boost daily engagement.
Transition: Create a seamless "Level Up" experience from Lite to Pro at 18.

Brand & Design Refresh

UI/UX: Implement a two-tiered design—playful for Fam Lite, and sleek for Fam Pro.
Communication: Evolve the brand from a "teen app" to a "Financial Sidekick" through a new tone and messaging.

Marketing & Partnerships

Growth Engine: Leverage finfluencers, campus activations, and branded social campaigns to drive adoption.
Retention: Implement gamified journeys and winback campaigns with new Fam Pro features.
Measurement: Continuously track retention, KYC, and engagement to refine our strategy monthly.
